EDUCATION

LNCT University

Computer Science and Specialization in AIML-CGPA: 7.7

Bhopal

2021-2025

SKILLS

Programming Languages: Java, SpringBoot, Python

Frontend Technologies: HTML, CSS, Bootstrap, Angular

Database: MySQL

Developer Tools: Git, GitHub, Postman, Jira

Course Work: Database Management System, Object Oriented Programming, DSA

EXPERIENCE

NorthBridge – AI Engineer

Jan 2026 – Present

Artificial Intelligence, Prompt Engineering

- Designed and optimized prompts for Large Language Models (LLMs) to improve response accuracy, contextual relevance, and output consistency.
- Conducted **testing and evaluation of AI model outputs**, refining prompts to reduce hallucinations and improve consistency of results.
- Collaborated with the development team to **integrate AI-powered features into applications**, leveraging prompt engineering techniques and AI workflows.

Cognizant – Full Stack Developer Intern

May 2025 – Aug 2025

Java, SpringBoot, MySQL, Angular, GitHub

- Developed a **web-based hospital appointment booking system** enabling patients to schedule doctor appointments and manage medical data efficiently.
- Built backend services using **Java and Spring Boot**, and integrated them with **MySQL** database for secure data storage and retrieval.
- Implemented **user authentication and registration modules**, ensuring secure access and personalized user experience.

G-Infosoft Technologies – Web Developer Intern

April 2024 – June 2024

HTML, CSS, JavaScript, MySQL, Excel

- Designed and developed a **responsive website** for a media channel using **HTML, CSS, Bootstrap, and JavaScript**, ensuring a clean UI and seamless user experience across devices.
- Integrated **data handling using Excel and MySQL** to manage and organize content efficiently for the media platform.

PROJECTS

Hospital Appointment Booking | Java, Spring Boot, REST API, Angular, MySQL

GitHub

- Developed a Hospital Management System using **Spring Boot microservices architecture** with modules for patient records, appointments, billing, and pharmacy management.
- Implemented **service discovery and routing using Eureka Server and API Gateway**, enabling seamless communication between multiple backend services.
- Built a responsive **Angular-based frontend integrated with REST APIs and MySQL**, providing a structured interface for managing hospital operations.

AI Resume Generator LLM | React, Spring Boot, AI, LLM

GitHub

- Developed an **AI-powered resume generator** using **React and Spring Boot**, leveraging prompt engineering and Large Language Models to automatically generate structured resume sections.
- Designed and optimized prompt templates to generate professional summaries, skills, and experience sections based on user inputs.
- Built a full-stack application with a **React frontend and Spring Boot backend**, enabling dynamic resume creation and improved user experience.
